# DAIRY MATS

BLANK  
SUFF

Products exported to Japan and used domestically in farms in T

## Features:

- Provide extra comfort for animals and prevents damage to their hoofs compared to concrete flooring, thus increasing animals' appetite and better health.
- Proven to increase milk output from milk cows as they feel more comfort when raised on these rubber mats.
- Assimilate cushiony feeling with that of grass.
- Versatile uses for all farm animals.
- Diamond non-slip top with grooves underneath to allow for liquid flow.
- Top surface does not trap water, allowing animals to be on dry surface at all times while providing surface to be easily cleaned.
